Better health care for your patients and communities  
with our data-driven strategies and technology built for  
Value.

Providers must direct the course of Value-Based Care, based on what you know best: evidence-based results. Roji Health Intelligence helps you deploy your patient data to create innovative Value-Based Care initiatives that raise the quality, equity, and affordability of your patient care. Enable a future of growth and success by unlocking intelligent, evidence-driven solutions to better health.

We bring decades of clinical, regulatory, and government and private health plan expertise to guide your strategies.

Our proven platform has the heft you need to provide true Value-Based Care:

Data aggregation from EHRs drawing on 20 years of experience in collecting and integrating data sources.

Informed data analysis to measure and improve clinical and cost performance.

Data-guided tools and strategies to improve patient health while succeeding under Risk.

control has been hard to achieve in Value-Based Care, regardless of incentives in payment models. With lowering total cost of care (TCOC) a key Quadruple AIM goal, APP Quality Reporting opens new avenues to ACOs to amplify their opportunities to examine patient costs and create targeted interventions. In this area we'll highlight five areas where ACOs can segue their quality measurement data into cost performance gains to lower TCOC.
